

# FAMILI - VAC

## VAC - 5

Model VAC-5 the Toolkraft FAMILI-VAC has been designed for family use on heavy cleaning jobs. It will quickly vacuum up sawdust, dirt and dust in basements, garages and patios.

### ASSEMBLY:

The FAMILY-VAC is shipped complete, ready to plug in and operate. Simply remove it from the carton, slip the hose into the hole marked "intake" and slip the nozzle onto the end of the hose.

### USE:

To assure maximum pickup power and motor life, change the filter bag whenever it becomes loaded with dust or dirt particles.

The drum covers may be removed by pulling out on the lever of the clamp ring. Be sure to replace the clamp ring when using your machine. If this ring is not replaced, you could have an air leak through the cover.

There is a carrying handle on the cover for your convenience in moving the machine to the job.

Note the intake and exhaust bushings have a turret action and can be swung around the VAC. This enables you to clean a 10' circle without moving the machine. Also, the VAC may be converted into a blower simply by inserting the hose into the exhaust opening.

Various FAMILI-VAC Toolkraft accessories are available to convert your machine for any dry pickup cleaning operation. The filter bag is easily changed by removing the old one and slipping a new bag over the cage and replacing the rubber band.

### MOTOR CARE:

The special vacuum motor in your FAMILI-VAC has sealed ball bearings and under normal use will need no maintenance. However, to assure long use, pay particular attention to these three things:

1. NEVER PICK UP WET OR HOT OBJECTS.
2. EMPTY THE DRUM BEFORE THE LEVEL OF DIRT IS HIGHER THAN THE MOTOR FILTER BAG.
3. CHANGE THE FILTER BAG REGULARLY.

Filter bags should be kept on hand for regular replacement. These may be ordered from your Toolkraft dealer or the factory. See the accessory section for prices, etc.

### ACCESSORIES:

A convenient caster dolly set will be a very useful added feature for your VAC. This may be ordered from your local dealer or the factory.

#STD-5      PRICE \$4.50

Another useful accessory for your FAMILI-VAC is the hose adaptor which will convert the 2 1/4" diameter to a standard household 1 1/4" opening. This will enable you to use most standard household cleaner adjustments and can be used as a high pressure blower nozzle.

#ADP-35      PRICE \$2.25

Additional lengths of hose are available from your dealer or from the factory. #HSE-225 is a 6'x2 1/4" dia. hose similar to the one on your machine. These may be added to your present hose by using a coupling adaptor (CPL-225).

#HSE-225      PRICE \$6.95

#CPL-225      PRICE \$1.00

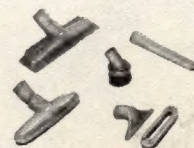

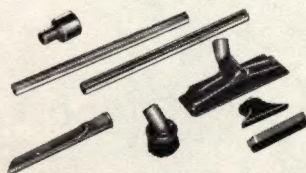

Also, Toolkraft has available as an accessory a 1 1/4" hose (HSE-125). This is a plastic reinforced hose similar to the 2 1/4" hose. The length is 5'7". Requires using ADP-35.

#HSE-125      PRICE \$4.95

Adapter (ADP-35) from 2 1/4" to 1 1/4" enables you to use all standard household attachments. Also used as high pressure nozzle.

Kit of 1 1/4" attachments. Includes adapter, wand extensions, crevice, drapery, carpet, and dusting nozzles.

Additional nozzles to add utility. Carpet nozzle, dusting brush, hard floor nozzle, crevice tool and drapery and upholstery nozzle.

## ACCESSORIES:

To greatly increase the use of your FAMILI-VAC, Toolkraft has made it possible to use all, standard, household 1 1/4" nozzle attachments. To adapt from the 2 1/4" hose on your machine to the household 1 1/4" size, use adapter ADP-35.

2 1/4"

### 6' HOSE AND COUPLING

1 1/4"

#### COUPLING (CPL-225)

Coupling for 2 1/4" hose sections \$1.00

#### HOSE (HSE-225)
